

Contact Management: Company, Contact Activity, Task

ADITO Software GmbH

From version xRM 2026.4.2 | July 2026

The background of the right side of the slide is a blue ocean with a large iceberg. A red and white lifebuoy is floating in the water in the foreground. The iceberg is partially submerged, with its tip above the water and its base below. The lifebuoy is in the foreground, partially obscuring the iceberg.

Content marked with  has been moved to [xRM-Help](#).

Screenshots

The UX design of ADITO is continuously optimized for you. There may therefore be deviations in the screenshots.

Communication & Address

Communication

Entry of telephone numbers

If letters are entered instead of digits when entering the extension number, they are replaced as digits in the same way as on telephone keypads.

A combination of three letters **must** always be used when entering.

Example: +49 0871 7**ADG** -> +49 0871 7**234**

If only one or two letters are entered, they are automatically deleted after a brief moment.

Communication

Starting a call (without CTI connection)

Communication

Making calls with CTI connection

If a CTI connection exists, the system supports telephony as follows:

- Clicking on the phone number in the preview triggers the call.
- Pop-up/notification for incoming calls shows the recognized data record (company or contact).
- The context that is opened by clicking on the pop-up can be specified in the user settings.

Whether and how this can be utilized must be considered in the relevant project.

Trigger a call

Employee

Click on the phone number to start the call.

Answering a call

Employee

Customer

Popup opens. Click on the pop-up to open the data record.

Communication

Contacts in the Outlook contact book

Do you need the companies or contacts from ADITO as Outlook contacts, for example?

Further information about this application can be found in the documentation on “EWS Contact Synchronization.”

Serial actions: adding attributes

5
Affected rows

+	Assessment / Indu ▼	Service ▼	-
	Conditions / Price ▼	! Value ^	-
		Standard	
		Key account	
		Special price list	
		Service	

Several attributes can be added, selected, and thus set simultaneously on the datasets.

After saving, a note is displayed indicating how many datasets the property has been set.

The serial action "Set attribute" is also available in the Contact and for Activities.

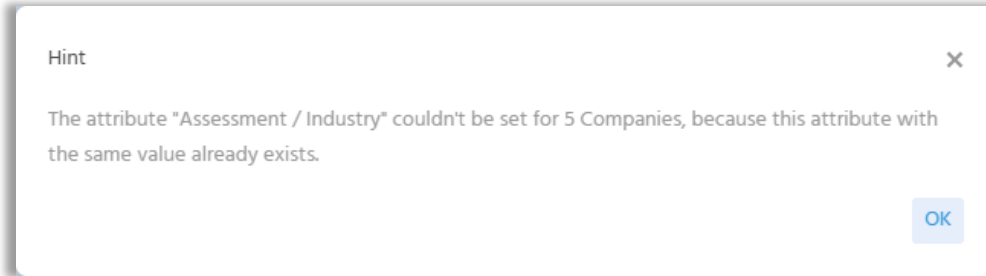

Serial actions: setting attributes

Please note how often a property can or may be set.

- Attributes, that are entered **a maximum of once per dataset** will be overwritten.
- Attributes that are entered **any number of times per dataset** are created **any number of times**.
- Attributes that are entered **a maximum of x times per dataset** are created **x times**. As soon as x is exceeded, the user receives a message.

Serial actions: setting attributes

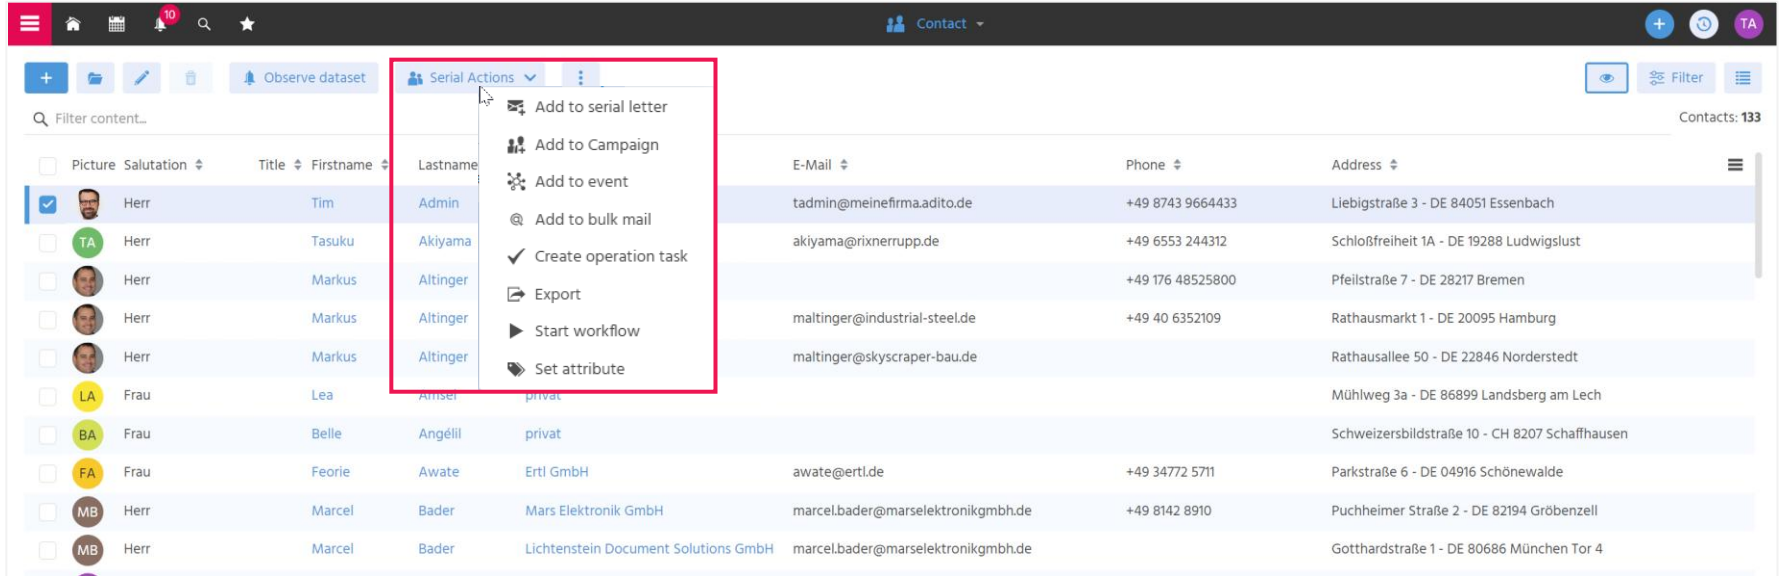

If the attributes **cannot be set** for some of the datasets, the information will be displayed in the hint after saving. The number of datasets for which the setting was not possible, along with their reasons, will be shown.

Possible reasons:

- Attributes with the same value already exist
- The maximum number of entered attributes for this dataset has already been reached.

Serial actions in the FilterView

The screenshot displays the ADITO Contact FilterView interface. A red box highlights the 'Serial Actions' dropdown menu, which is open, showing the following options:

- Add to serial letter
- Add to Campaign
- Add to event
- Add to bulk mail
- Create operation task
- Export
- Start workflow
- Set attribute

The background shows a list of contacts with columns: Picture, Salutation, Title, Firstname, Lastname, E-Mail, Phone, and Address. The 'Lastname' column is currently selected, and the 'Serial Actions' menu is open over it.

ADITO

Tab “Attributes” – table “Attributes”

- Qualify companies using additional information through attributes.
- **Advantages:**
 - Attributes can be maintained centrally at this stage.
 - Attributes can be used as filter criteria and be maintained in the FilterView with serial actions in the selected datasets.
 - Attributes can be adjusted and extended by the specialist administration.

Attribute	Value
Competitor	
Strength	Personal appearance
Conditions	
Pricelist	Key account
Payment term	30 days net
Assessment	
Industry	Trade
Target group	Customer
Creditworthiness	B

Sensitive attributes

Attribute: ! Attribute
Value: Value

Required value is missing

Save Cancel

Tab “Attributes” – table “sensitive attributes”

- For what are attributes used?
To map sensitive information to the company using attributes,
 - which may be visible only to a restricted group of participants.
 - which may be maintained only by a limited number of participants.A “restricted group of participants” can be defined in such a way that different departments use different sensitive attributes and do not have access to one another.
- This allows the sales department, for example, to enter information in the company that is used solely within the department.
- **Advantages:**
 - Sensitive attributes can be maintained centrally for each dataset (not through serial action) if the user has a corresponding authorized role.
 - Sensitive attributes can be used as filter criteria.
 - Sensitive attributes can be adapted and extended by specialists in the administration.

Company

Tab "Relations"

Displayed here are the relations between companies and if applicable, between companies and contacts.

The screenshot shows the ADITO software interface. The top navigation bar includes icons for home, calendar, notifications (10), search, and favorites. The main header shows "Company - SuperBauer AG" with a dropdown menu and user profile icons. The "Relations" tab is selected, showing a list of relationships. The left sidebar indicates the current view is for "Industrial Steel AG".

Relations: 9

- parent company
 - Fahey, Spencer and Armstrong
- member
 - Firmengruppe Matthias Bogen
- subsidiary
 - SuperBauer AG since 2012
- collaboration with
 - Transatlantik Logistics GmbH
 - Skyscraper Bau GmbH

Company

Tab “Relations”: Hierarchy levels

The screenshot shows the ADITO interface with the 'Relations' tab selected. The interface displays a list of subsidiaries under the company 'Fahey, Spencer and Armstrong'. A callout box points to the '+ Create new' button, stating: "Add further relations by using the 'Create new'". Another callout box points to the framed section of the organization chart, stating: "In the screenshot, you can see the framed section of the organization chart from the perspective of the company 'Fahey, Spencer and Armstrong,' which was opened in the MainView."

Company

Tab "Relations": Hierarchy levels

The screenshot shows the ADITO software interface. The top navigation bar includes icons for home, calendar, notifications (10), search, star, and a dropdown menu for 'Company - SuperBauer AG'. The main content area is titled 'Relations' and shows a list of relationships. A 'parent company' section is expanded, showing 'Industrial Steel AG' as the parent company, with 'since 2012' noted below it. A red rectangular box highlights this section, with a callout line pointing to the text box on the right.

In the screenshot, you can see the framed section of the organization chart from the perspective of the company "SuperBauer AG", which was opened in the MainView.

Company

Tab “Relations”: Hierarchy levels

In the screenshot, you can see the framed section of the organization chart from the perspective of the company “Industrial Steel AG”, which was opened in the MainView.

Company

Filter relations

Using the **“Object relation: Relationtype”** filter, you can filter all records that have the selected relationship type stored.

Company

Example: "Relationships: Relationship Type equals Parent Company"

➤ The result is a list of all companies for which a parent company has been specified.

The screenshot displays the ADITO interface with a filter applied to the 'Company' dataset. The filter is 'Object relation: Relationship Type equals Parent Company'. The left sidebar shows a list of companies with checkboxes: Picture, Name, and Cus. The main area shows two diagrams illustrating the results of the filter.

Legend:

- Light blue square: has a parent company
- Dark blue square: has a subsidiary

Diagram 1 (Left): Transatlantik Logistics GmbH (light blue) is connected to meineFirma GmbH (dark blue).

Diagram 2 (Right): Fahey, Spencer and Armstrong (dark blue) is connected to Kronen AG (light blue), Industrial Steel AG (light blue), and Glob Group (light blue). Kronen AG is connected to SuperBauer AG (dark blue). Industrial Steel AG is connected to SuperBauer AG (dark blue).

Filter Panel (Right):

- Grouping:** Group by (dropdown)
- Condition:** Join conditions by: all (selected), one (available). Status not equal "Inactive" (x). Object relation: Relationship Type equals Parent Company (x).

Company

Example: "Relationships: Relationship Type equals Subsidiary"

➤ The result is a list of all companies that have at least one subsidiary on record.

The screenshot displays the ADITO interface with a company relationship diagram and filter settings.

Company Relationship Diagram:

- Legend:**
 - Blue square: has a parent company
 - Black square: has a subsidiary
- Diagram Structure:**
 - Transatlantik Logistics GmbH** (black square) is the parent of **meineFirma GmbH** (blue square).
 - Fahey, Spencer and Armstrong** (black square) is the parent of **Kronen AG** (blue square), **Industrial Steel AG** (black square), and **Glob Group** (blue square).
 - Industrial Steel AG** (black square) is the parent of **SuperBauer AG** (blue square).

Filter Settings:

- Grouping:** Group by (dropdown)
- Condition:** Join conditions by: all (selected), one (available).
 - Condition 1: Status not equal "Inactive" (x)
 - Condition 2: Object relation: Relationship type equal "subsidiary" (x)

Company

Company-specific document storage

Documents related to the company can be

- stored as binary files in the standard **'Documents' tab**, or
- via a **SharePoint link** in the 'Further information' section of the companies preview. This means that a SharePoint folder can be accessed directly from ADITO.

The screenshot displays the ADITO interface for a company profile. At the top, there is a star icon, a circular logo with a red 'B' and the name 'Bucher', and a close button. Below this, the company name 'Bucher Unternehmensgruppe' and its identification number 'Cust.-No.: 3698' are shown. A navigation bar contains icons for folders, documents, a timer, and a menu. The main content area is divided into sections: 'Tags' with an input field 'Enter tag'; 'Communication'; 'Addresses'; 'Further information' which contains a table of details; 'Relevant Documents'; and 'Turnover'. A vertical sidebar on the left is labeled 'Company' with a back arrow. The 'SharePoint Link' entry in the 'Further information' table is highlighted with a red rectangle.

Further information	
Preferred language	German

Company

Classification

- Attributes and fields of the Context that are relevant for classification and are already maintained by the company are used for the classification.
- In the case of attributes that can be set multiple times, the property with the highest value is utilized.
- The classifications are rated (A, B, C, D, etc.) depending on the points earned.
- The “Show Classification” action brings up the detailed overview of the classification and recalculates it based on the latest database (for more information, see the following slide).

The screenshot displays a user interface for a company profile. At the top, there's a navigation bar with icons for home, calendar, notifications, search, and favorites. The main header shows the company logo (a red circle with a white stylized 'G'), the name 'Glob Group', and the customer number 'Cust.-No.: 1212'. Below this, there's a section for 'Tags' and 'Communication' with contact details: E-Mail (contact@globgroup.com), Phone (+44 20 1432 3000), and another Phone (+49 871 9751500). The 'Addresses' section is empty. The 'Further information' section shows 'preferred language' as English, 'Status' as Active, and 'Type' as Customer. The 'Relevant Documents' and 'Turnover' sections are also empty. A dropdown menu is open on the right side, listing various actions: 'Observe dataset', 'New task', 'Write email', 'New letter', 'Add to Campaign', 'New offer', 'New opportunity', 'New operation recommendation', 'Show Classification' (highlighted with a red box), 'New operation', 'Create operation task', 'New appointment', 'Add to serial letter', 'Add to bulk mail', 'Open Location', 'Radius Search', 'Customer Base Sheet', 'Start workflow', 'Edit defaults', and 'Open admin view'. At the bottom, there's a status bar with three indicators: '94 Days inactive', '0% Turnover change', and 'BB Classification'. A dark blue speech bubble points to the 'Show Classification' option in the dropdown menu.

Identification of the classification in the MainView (and in the FilterView)

94 Days inactive | 0% Turnover change | BB Classification

Classification: Indicator, Values, Valuation

Classification ×		
Classifications: 6		
☐ Indicator	Value	Valuation
☐ ▼ 1. Classification: 53/85 points = B (3)		
☐ Assessment / Industry	Maschinenbau	20/32 Points
☐ Assessment / Target group	Kunde	30/30 Points
☐ Assessment / Employee count	270.00	3/22.5 Points
☐ ▼ 2. Classification: 76.5/100 points = A (3)		
☐ Assessment / Loyalty	Mittel	24/40 Points
☐ Assessment / Creditworthiness	B	22.5/30 Points
☐ Assessment / Risk	kein Risiko	30/30 Points

- Classifications comprise several parameters from a specific subject area.
- Indicators can be dynamically available; this means that, for example, different information is entered for a Prospect than for a Customer.
- The indicators consist of attributes and fields of the Context, which are relevant for the classification.
- Values that are available for selection for the attributes and fields are scored.

Company

Company changes name (1/2)

In the Preview: click on the Edit-button in order to change the company name.

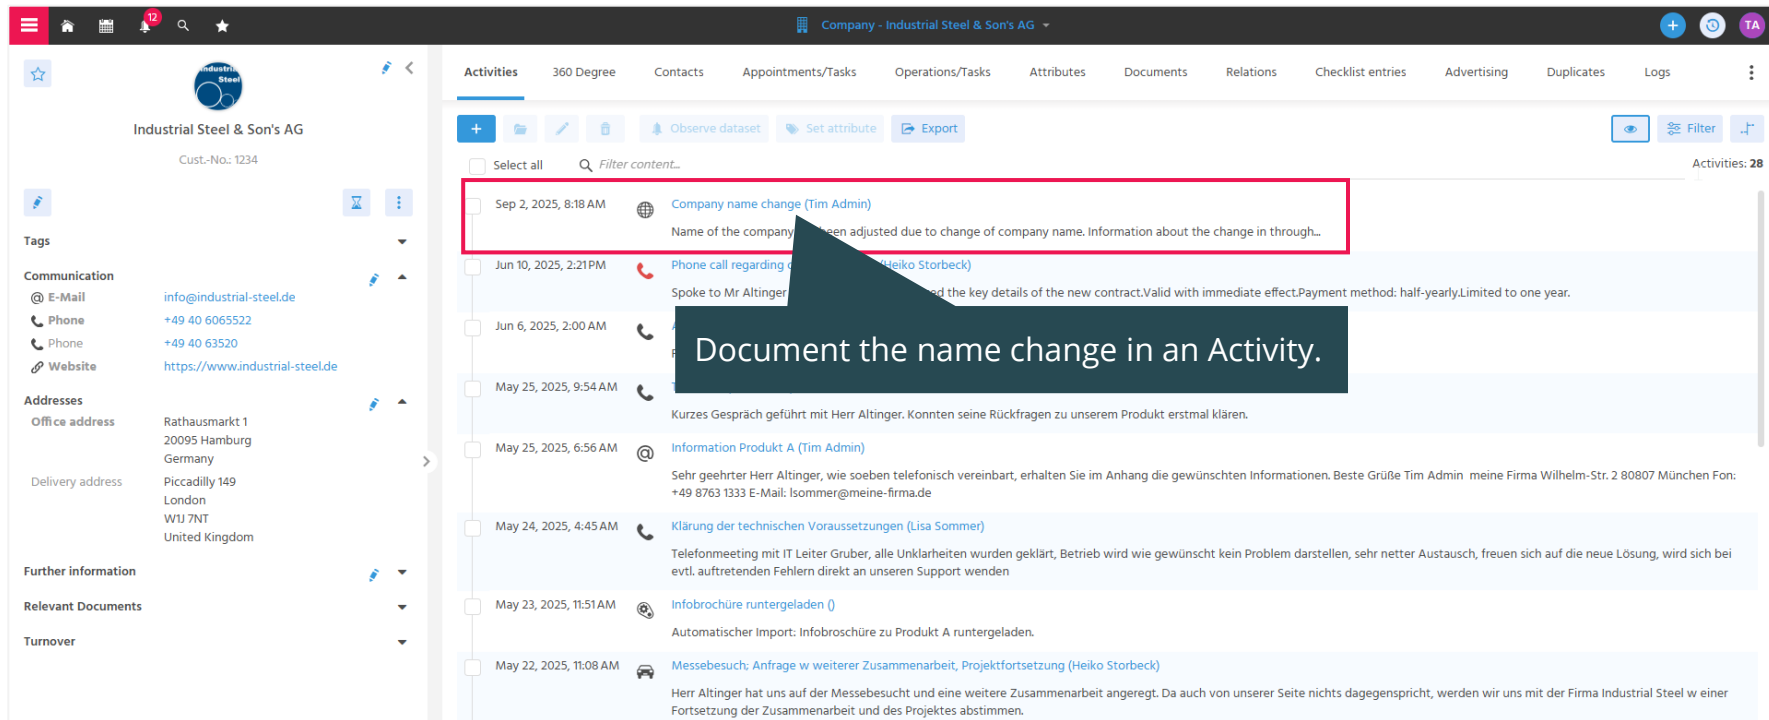

The card displays the company logo (Industrial Steel) and name (Industrial Steel AG) with customer number 1234. A red box highlights the edit icon (pencil) in the top right corner. A speech bubble points to this icon with the text: "In the Preview: click on the Edit-button in order to change the company name." Below the card, there are sections for "Tags" and "Communication", each with an edit icon and a dropdown arrow.

The edit form shows the company name "Industrial Steel & Son's AG" and customer number "1234" in input fields. A red 'X' icon is next to the logo. At the bottom, there are "Save" and "Cancel" buttons. Below the form, there are sections for "Tags" and "Communication", each with an edit icon and a dropdown arrow.

Company

When can a company be deleted?

- If there are **no further links** behind the company
 - The company can be deleted from the CRM by the user using the delete button
- If there are **additional links** associated with the Company (in Activities, Contacts, Tasks, Documents, Opportunities, Offers, Contracts or Relations), the dataset can no longer be deleted.
 - The company will be set to **Status = inactive** by the user.
- If a company is a **duplicated dataset**
 - Resolve duplicates, so the duplicate will be deleted.

Filter can be used in the other available view modes.

In the Tooltip, the address is shown.

By clicking on the pin, the Preview opens.

Contact

Contact – technical mapping

Example

Mr. Miller appears several times in the system:

- Mr. Miller is always the same person
→ **one person record**
 - Personal data that is the same in every function (e.g. name, date of birth)
 - Storage in the person record
- Mr. Miller can hold various functions
→ **one or more contact records**
 - Function-related data that varies depending on the function (e.g. company, communication data)
 - Stored in the contact record
 - The function can also be 'private' if the person is registered as a **private individual**

In ADITO, a **contact is always** represented as a **combination of person and function**.

Contact

Personified Lettersalutation

You can enter an individual salutation for the contact as a “personified lettersalutation”.

- The personified letter salutation can be subsequently added in the Preview of the contact. It will then be used in letters and emails.
- If no personified letter salutation has been added, it will be created by default from the salutation, title and surname.

The screenshot displays a contact management interface for a contact named Mr. Joe Miller. The contact's profile includes a yellow circular avatar with the initials 'JM' and the company 'Aquire GmbH'. A sidebar on the left lists various contact details categories: Tags, Communication, Addresses, Company Addresses, Further information, and a 'Contact' section. The 'Further information' section is expanded, showing fields for Gender (Male), Salutation (Mr.), Date of birth, Preferred language (English), Status (Active), Department (Sales), Contactrole (Sales manager), and Position. The 'Lettersalutation' field is highlighted with a red border and contains the text 'Hello Joe'. Below this field are 'Save' and 'Cancel' buttons. At the bottom, there are counters for 'Other active functions' and 'Open tasks', both showing a value of 0.

The screenshot shows the ADITO interface for a contact named Mr. Cameron Doyle. On the left, there is a sidebar with contact details including tags, communication (E-Mail: doyle@globgroup.com), addresses, and company addresses. The main area displays a list of activities for this contact. A context menu is open over the activities list, with the 'New vCard' option highlighted. On the right, a panel shows the 'Download vCard' button, which is the target of the export action.

Activity

Activity

Definition

Activities document the **communication that has taken place** and are **linked to the objects** that are involved.

The link shows the activity for the objects involved (e.g. the dataset of the company, the contact who was spoken to, the offer that prompted the call, etc.)

In ADITO, the activities are recorded using 3 characteristics:

- **Category:** Phone, mail, visit, online meeting, etc.
- **Direction:** outgoing, incoming, internal
- **Key activity:** yes/no – optical indication of very important activities

The distribution of tasks is mapped separately via the “Tasks” context.

Activity

Linking with objects

Activity is linked with corresponding datasets depending on the situation.

Example:

You have telephoned with Mr. Miller from Company A.

- **Activity “Phone”** is connected with object **Mr. Miller** and object **Company A**

Activity

Automatic links when creating

Click on the ⌚ button, to link a new activity with the dataset of **Markus Altinger** and the dataset of **Industrial Steel AG**.

Thus, after saving, it is only visible at Industrial Steel AG; all other companies where Mr Markus Altinger is active remain unaffected.

The ⌚ button is hidden for inactive datasets (Company/Contact). When creating a new activity, inactive contacts can no longer be searched in the link selection.

Creating new (1/3)

90

Required value is missing

Activity

Creating new (2/3)

Templates can be used to make it easier to record the content of an activity.

These are selected in the “Templates” field and added in the “Description” field under any text that has already been entered. Several templates can also be added.

For example, an “initial visit” can be documented using the “Visit report” and “Initial contact” templates.

In addition, “topics” can be stored on the templates, which are inserted in the activity when the template is used. If topics are set to inactive at some point, they are no longer applied. If topics are stored in several templates, they are only inserted once in the activity.

Activity

Creating new (3/3)

The datasets from which the new creation of the activity was initiated are automatically linked. In this case, the “New activity” action was performed on the “Markus Altinger” contact. Consequently, the company for which this contact works is also automatically linked.

The screenshot shows a form for creating a new activity. The form is divided into several sections with callouts explaining specific features:

- Date:** 9/2/2025
- 12:56 PM**
- Category:** ! Category (Red icon indicates a key activity)
- Direction:** ! Direction (Red icon indicates a key activity)
- Responsible:** Tim Admin
- Key activity:** ☐ (Callout: To visually highlight an activity with particularly important information in the overview, it can be marked as a “key activity”. The icon for the activity is then displayed in red.)
- Connection:**
 - Contact:** Mr. Markus Altinger
 - Company:** Industrial Steel & Son's AG
 - Type:** ! Type (Red icon indicates a key activity)
 - Object:** ! Object (Red icon indicates a key activity)
- Add Attribute:** Attribute (Callout: Additional links to other datasets can also be included.)
- Document:** + (Callout: The “File upload” field can be added to record documents (e.g., scanned letters).)
- Only favorite topics:** ☐
- Topic:** Vertrieb > Erstkontakt > Allgemein (Callout: Further information to [topic tree](#))
- Advertising shipment:** ☐ (Callout: Further information about the advertising shipment can be found in the documentation to the topic “Sales”).

At the bottom, there are buttons for **Save** and **Cancel**, and a red error message: **Required value is missing**.

Activity

Mentioning colleagues

For example, to draw the attention of several colleagues to the information recorded in an activity, they can be mentioned in the activity's description.

This means that they can quickly find out about it or implement small tasks directly. It is no longer necessary to derive a task from the activity.

As soon as the activity is saved, the mentioned colleagues receive a notification.

The screenshot displays the ADITO application interface. The top navigation bar includes a menu icon, home, calendar, notifications (with a red badge showing '2'), search, and star icons. The main content area shows a list of activities. The first activity is dated 'Aug 14, 2024' and titled 'Confirmation of interests', with a sub-note 'You were mentioned'. The second activity is titled 'Phone call for contract updates', also with a sub-note 'You were mentioned'. The right sidebar provides a detailed view of the selected activity, 'Phone call for contract updates', dated 'Aug 14, 2024, 10:37 AM'. It includes sections for 'Details', 'Connections' (listing 'Herr Markus Altinger'), and 'Description'. The description text is: 'Had a phone call with Mr Altinger to talk about the conditions of the new contract. Valid immediately. Payment method: semiannual. Limited to a year'. At the bottom of the sidebar, a red-bordered box highlights three mentions: '@slustig Please adjust contract', '@lsommer FYI', and '@ppffig Please keep in mind with Marketing, send inquiry about this topic'.

Activity

Mentioning colleagues

Mention colleagues by entering the first letter of their name after the @ sign (without spaces).

You will then be shown a **selection list** that uses autocomplete, and you can select from it.

The mentioned colleagues will receive a notification (see previous slide) and can be informed.

The screenshot shows an email composition window. On the left, there are fields for 'Subject', 'Template', and 'Description'. On the right, there is a 'Confirmation of interests' section with a 'Template' dropdown. Below this is a rich text editor toolbar with various icons for text formatting and insertion. The main text area contains the sentence 'We have entered the following information for you:'. Below this sentence, an autocomplete selection list is displayed, triggered by the '@p' prefix. The list shows three suggestions: '@pstrauss', '@cpabst', and '@ppfiffig'. The first suggestion, '@pstrauss', is highlighted with a blue background. A red rectangular box is drawn around the entire selection list. At the bottom of the window, there are fields for 'Date' (showing '8/14/2024' and '10:41 AM') and a small icon.

Activity

Manual relinking

If you would like to connect additional datasets with the activity, you can also do this subsequently in the Preview.

To do this, edit the area “Connections” and add the respective dataset.

Topic tree

- With the topic tree, the possibility has been created to assign topics to Contexts (e.g., activities), which are organized in a tree structure. A description (free text) can be stored for each of these topics.
- This means that datasets of these Contexts can be recorded quickly and in a structured manner, and evaluated (filtered) by topic in order to derive recommendations for action from this analysis. The analysis, based on the topics, can also take place in linked datasets, such as company/contact information according to topics that were recorded in linked activities.
- An even more efficient use of the topic tree is possible by utilizing topic tree favorites or topic tree presets. The most important topics are individually marked or categorized by department to enable quicker access or automatic entry.

Further information on the use and administration of the topic tree can be found in the separate document titled “Contact Management: Topic Tree”.

Activity

Tab “History”: connection with Tasks or Activities

- Tasks, service tickets, or subsequent activities can be created for an activity.
- The connections are displayed in the tab “History”.

The screenshot displays a software interface for managing activities. At the top, a red phone icon is next to the title "Phone call regarding contract update". Below the title, the date and time "Jun 10, 2025, 2:21PM" are shown. A sidebar on the left contains icons for a folder, a pencil, and a trash can. The main content area is divided into sections: "Details", "Connections", and "Description". The "Details" section lists "Direction" (Outgoing), "Category" (Phone), "Responsible" (Heiko Storb), and "Key activity" (Yes). The "Connections" section lists "Task" (Rahmenvert), "Company" (Industrial Steel & Son's AG), "Contact" (Mr. Markus Altinger), and "Contract" (Framework contract 1005 | Valid, limi...). The "Description" section contains the text: "Spoke to Mr Altinger on the phone and discussed the key details of the new contract. Valid with immediate effect. Payment method: half-yearly. Limited to one year." A context menu is open over the "Connections" section, listing options: "Observe dataset", "Export", "New task", "New offer", "New Service ticket", "Open admin view", and "New appointment".

Phone call regarding contract update

Jun 10, 2025, 2:21PM

Connections

Task: Rahmenvert

Company: Industrial Steel & Son's AG

Contact: Mr. Markus Altinger

Contract: Framework contract 1005 | Valid, limi...

Description

Spoke to Mr Altinger on the phone and discussed the key details of the new contract.

Valid with immediate effect.

Payment method: half-yearly.

Limited to one year.

Activity

Creation of an appointment from the activity

If, for example, a call log is created for a contact and a telephone call with an appointment is logged in it, then it is possible to create an appointment from this activity.

- The appointment will be connected with the activity; in the appointment the connections from the activity will be taken over.
- The subject of the activity will be adopted into the information field of the appointment.

Activity

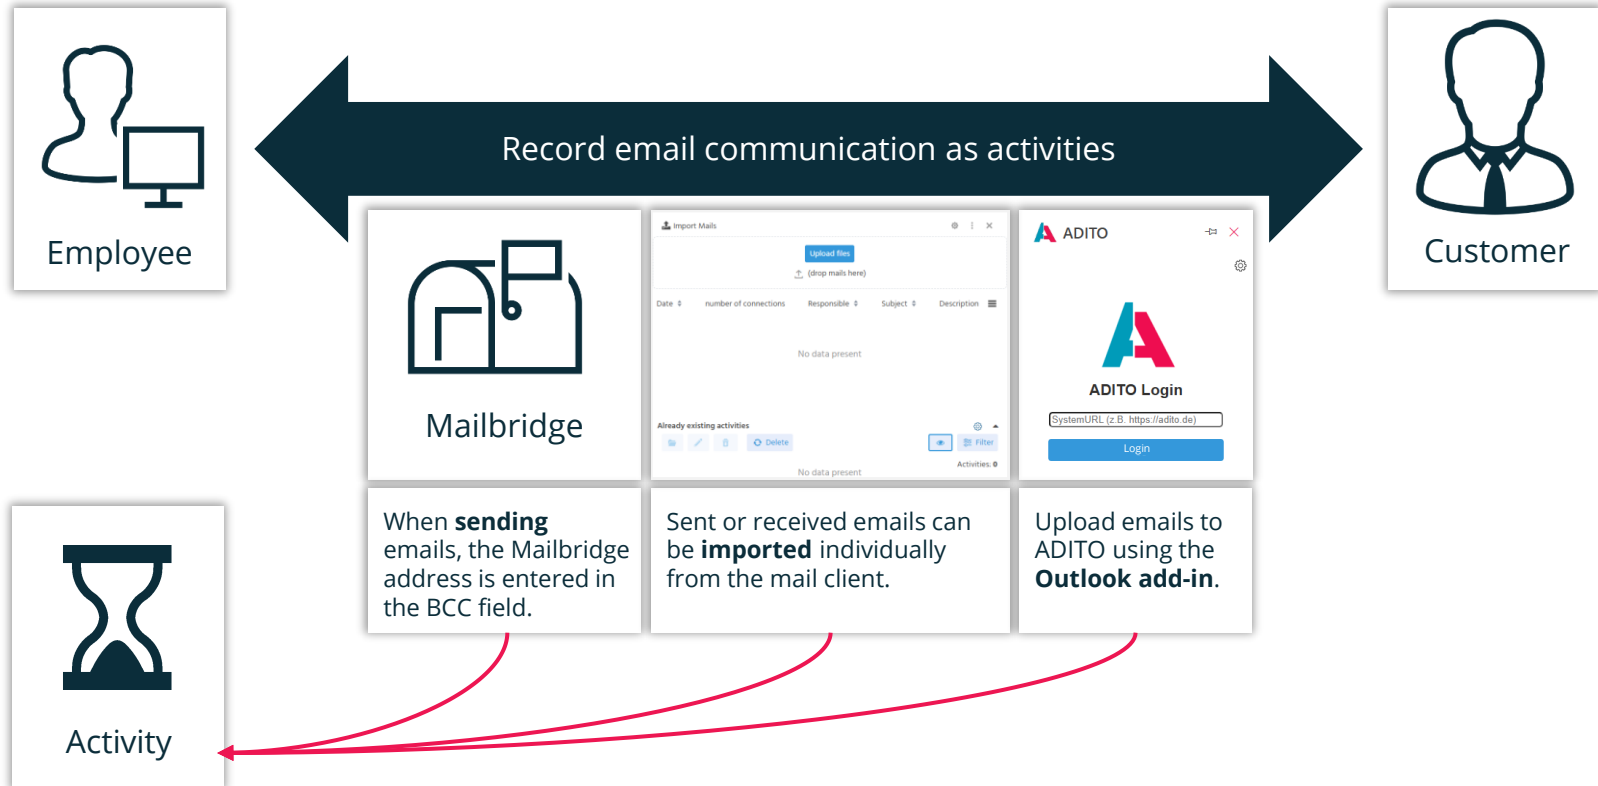

Automatic creation of activities for

- Creation of letters
- Sending/receiving emails (via Activities Mailbridge, Import Dashlet, or Outlook Add-in)
- Sending out serial mails
- Step change in campaigns
- Editing a service ticket
- Or different processes (processes/actions), which are documented by an activity from the system

Explanation: When creating a letter, email, or serial mail, the dataset is automatically linked to the recipients. The activity can therefore also be found through the datasets (e.g., the “Activities” tab in the Company).

Activity: automatically record emails

Activity: automatically record emails

Activity: automatically record emails

Record activities using AI and link them to the corresponding data

To reduce the need for manual linking to activities, AI can be used to automatically create links to relevant records (opportunities, offers, receipts, and contracts) when importing emails (Mailbridge, Outlook add-in, Import Dashlet).

1. First, the sender and recipient information is determined.
2. Then, the information about the external contact (sender or recipient) is retrieved and linked to the activity. In doing so, the linked contexts from the “360 Degrees” tab are taken into account (opportunities, quotes, documents, contracts).
3. If information is found in the email that matches a record from the “360 Degrees” tab, it is linked to the activity.

Activity: automatically record emails

Outgoing email

When **sending** an email, the address of the Mailbridge will be added to the **BCC field**.

Activity: automatically record emails

Outlook Add-In

The ADITO Outlook Add-In integrates ADITO xRM functionality directly into Microsoft Outlook. It provides seamless access to business-relevant data from within Outlook, eliminating the need to switch applications.

The ADITO Outlook add-in enables you to:

- Display ADITO system data within the Outlook client.
- Open corresponding ADITO datasets in the ADITO client.
- Import (outgoing or incoming) emails directly from Outlook into the ADITO system.

Information on **installation and use** can be found on the new help website.  [Installation and Usage | ADITO platform](#)

Activity: import mails

Dashlet "Import Mails"

The Dashlet "Import Mails" can be placed on the "My Dashboard" to enter (outgoing or incoming) emails as activity in ADITO.

Click x after each upload to upload the file again.

With Office 365, it is necessary to cache the mail on the desktop, for example, to drag it from there to the dashlet.

Activity: emails

Avoiding duplicates with activities from emails

- If an email has already been entered as an activity, it is displayed in the dashlet in the "Existing Activities" area and can be opened for further processing.
- If the email is received in the mail bridge a second time, the duplicate is discarded.

Click on the  button to update the view.

Activity: import emails

Please note:

Possible file formats for import:

- EML
- MSG (converted to EML during upload)

If the email subject line is missing, the activity will be created with the subject line "without subject."

If **invalid file formats** are imported, a message will be displayed:

E-mail processing error

During processing the e-mail an error has occurred.
Please contact an administrator.

OK

The screenshot displays the ADITO interface for importing emails. On the left, the 'Import Mails' dialog shows an 'Upload files' button and a status message: 'processed 1/1: one activity from mail created'. Below this, a table lists imported activities. One activity is highlighted with a red box around the subject line 'without subject'. The table headers are 'number of', 'Responsible', 'Subject', and 'Descrip'. The activity details on the right show the email was sent on 'Sep 16, 2025, 2:26 PM' by 'Tim Admin' to 'tadmin@meinefirma.adito.de'. The subject is 'without subject'. The 'Details' section shows the email is 'Outgoing', 'E-Mail', and 'Responsible' to 'Tim Admin'. The 'Connections' section lists 'Company' as 'Skyscraper Bau GmbH' and 'Contact' as 'Herr Markus Altinger'. The 'Relevant Documents' section shows 'MailEml'. The 'Description' section shows 'From: tadmin@meinefirma.adito.de', 'To: maltinger@skyscraper-bau.de', 'Cc: -', 'Sent: 16.09.2025 14:26', and 'Subject:'. The bottom of the description section indicates 'no attachments'.

Activity: emails

Sender-receiver link

- For **external senders** and **internal recipients** who are recorded in the system,
 - a link to the external sender is created
 - the internal recipient becomes the importer and will be added as Responsible
- For **internal senders** and **external recipients** that are recorded in the system
 - creates a link to the external recipient
 - the internal sender is the importer and is listed as the responsible party

Who is who?

- **Sender**
 - **Extern** = external contact (at an external company or private), who is recorded in the system
 - **Intern** = employee (at my company) who is recorded in the system
- **Recipient**
 - **Extern** = external contact (at an external company or private), who is recorded in the system
 - **Intern** = employee (at my company) who is recorded in the system
- **Importer** = employee (at my company), who is recorded in the system

Activity: email

Handling of email attachments or inline attachments

If emails with attachments and/or images as inline attachments are recorded as activities (via the Mailbridge or the Import Dashlet), they are processed as follows:

- Attachments are stored in the “Documents” tab and displayed in the preview.
- The EML file (of the email) is stored in the “Documents” tab.
- Inline attachments are displayed in the description.

The screenshot displays the ADITO interface for handling email attachments. The left pane shows an email preview for 'Eine Mail für' dated 04/08/2026. The 'Relevant Documents' section lists four attachments: ProduktNr6.png, Anhang_AGB.pdf, Anhang_Bild.png, and Information.docx. The 'Description' section shows the email header and body text, including the sender (tadmin@meinefirma.adito.de), recipient (TimLeman@magic-gray.de), and subject (Eine Mail für). The right pane shows the 'Documents' tab with a table of stored files.

Filename	Filetype	Filesize	Show in preview	Chang
ProduktNr6.png	PNG Image	12.3 kB	Yes	Jul 14, 2026
Mail.eml	Email Message	9.9 MB	No	Jul 14, 2026
Anhang_AGB.pdf	PDF Document	9.3 kB	Yes	Jul 14, 2026
Anhang_Bild.png	PNG Image	6.7 MB	Yes	Jul 14, 2026
Information.docx	Microsoft Word Document	578.9 kB	Yes	Jul 14, 2026

Activity

Recipient/sender address won't be recognized

If the recipient/sender address cannot be assigned during import, an **unlinked activity** is created. This can be [linked manually](#).

You can find these unlinked activities with help of the filter “Is unlinked activity” in the FilterView of the activities.

This allows you to clean them up.

The screenshot shows a filter configuration window titled "Condition". It includes a "reset" button in the top right corner. Below the title, it says "Join conditions by:" followed by two buttons: "all" (highlighted in blue) and "one". The main area contains a single condition: "Is unlinked activity equal 'Yes'". This condition is displayed in a light blue box with a close button (X) on the right. Below this box, there are three dropdown menus: the first is "Is unlinked activity", the second is "equal", and the third is "Yes". Each dropdown has a downward arrow icon on its right side.

Category: system

Activities with the category "System" were created by processes/activities and should document specific processes. These activities created by the system should not be able to be edited or deleted by standard users.

- The value "System" in the EditView is not available for the default user.
- Activities with the category "System" can only be deleted by or edited by users with the role "administrator".
- Filtering and grouping according to the category "System" is possible.

Activity

Summarize activities supported by AI

To use the AI function for summarizing activities, **the AI modules must be used**.
If the AI modules are not used, the “Summarize” button will not be displayed in the “Activities” tab.

The screenshot shows the ADITO interface for a contact named 'Herr Markus Altinger' from 'Industrial Steel AG'. The 'Activities' tab is active, displaying a list of activities. The 'Summarize' button is highlighted, and a tooltip indicates it 'Summarizes a maximum of 50 activities'. A callout box explains that to summarize activities, one should select all or the desired activities and execute the 'Summarize' action.

Activity

Summarize activities supported by AI

The screenshot shows the 'Activity' form in ADITO. The 'Subject' field contains 'Summary of 30.10.2024 - 10.06.2025'. The 'Template' dropdown is set to 'Template'. The 'Description' field contains a paragraph of text generated by AI, starting with 'Mr. Altinger has been in contact regarding our products...'. A green highlight is placed at the end of the text, with a tooltip that says 'AI created'. The 'Date' field is set to '8/7/2025', the 'Time' field is '1:04 PM', and the 'Category' dropdown is set to 'Note'. The 'Direction' dropdown is set to 'Internal', the 'Responsible' field is 'Tim Admin', and the 'Key activity' field is empty. At the bottom, there are 'Save' and 'Cancel' buttons.

Description •

Choose langu... Paragraph AI A² A³ A⁴ B I U Source H1

Mr. Altinger has been in contact regarding our products, expressing interest and enthusiasm. Several discussions, including phone calls and visits, have taken place to clarify questions and discuss contract details. A product presentation with positive feedback on design and pricing. Additional materials, such as brochures, have been sent. The next steps are pending the signing of a non-disclosure agreement, indicating progress toward a potential collaboration.

Key activity

Save Cancel

The new activity view opens.

The description ends with the addition "AI created," so that it is clear that the text was generated by AI.

The system presets "Note" as the category.

Task

Task

Definition

Tasks help passing on open tasks:

- A person/group is assigned a task to work on

Tasks will be directly created from a dataset (company, contact, activity, etc.) and are linked to it. Generally, the task is displayed in a separate tab. If there is an underlying activity, the task can be seen in the “History” tab.

Group tasks, single tasks & confidential tasks

- Tasks can have a due date, a status and a priority.
- Tasks can be assigned to **several users** comparable to a **task pool**. As soon as the editor sets it to completed, the task is completed for everyone.
- Tasks can be assigned to **several people** as an **independent task**, so that each registered editor receives the task as an independent individual task. This must be set when creating a new task.
- If no editor nor department has been selected, the requestor will be automatically entered as editor.
- **Confidential tasks** with the indicator “private” can only be viewed by the requestor and the editor/s.

Task

Priority and due date are presented with colors and icons

Due date \ Priority				
	None	Low	Normal	High
Not due Begin time (date/time) is in the future and before the due date				
Due Begin time has been reached/exceeded, but is still before the due date				
Overdue Begin date and due date have been reached/exceeded

Task

Tab “History”: Link with service tickets or activities

- Service tickets or subsequent activities can be created for a task.
- These links can be seen in the “History” tab.

Task

Use Cases

When using tasks, there are various use cases:

- Where can I see my tasks that I have to work on?
 - [In the FilterView “Tasks”](#)
 - [In Dashlet “Appointment/Tasks”](#)
- Where can I see if someone has finished the task that I have created for them?
 - [Observations of tasks with me as requestor](#)
- How can I take over tasks of somebody else?
 - [In the FilterView Tasks, you can adjust the filter](#)
(taking into account the authorization concept)
- ...

Task

Overview for editors

Each editor receives its own tasks and the tasks from the “pool” using **predefined filters**. This will be used...

- In the **Dashlet “My tasks”** and
- In the **FilterView** of the Context “Tasks”.

Tasks with the status “completed” are not displayed anymore. When the filter is removed, you can also view the completed tasks once again.

If the department (Sales) additionally separated (office and external staff), the filter on the “Sales” department provides all tasks that have been set for internal sales, field sales or directly for sales.

The screenshot displays the ADITO filter configuration interface. It features two main filter conditions, each with a header bar containing 'all', 'one', 'Add filter condition', and 'Add group' buttons. The first filter condition is 'Status not equal "completed"', with a red 'x' icon on the left. The second filter condition is 'Editor equal "Tim Admin"', also with a red 'x' icon on the left. Below the 'Editor' filter, a table shows the value 'Tim Admin' for the 'Editor' field. A third filter condition, 'Department equal "Departments / IT"', is partially visible at the bottom. Two callout boxes provide additional context: one points to the 'Editor' field value, stating 'As editor, the signed in user is displayed.', and another points to the 'Department' filter, stating 'As well as the department, in which the employee is working in.'

Task

Overview for editors

With the Dashlet “Appointments/Tasks” you can see the followig:

- Overdue tasks
- New tasks (status “new”)
- Imminent appointments for today

Task

Were the tasks completed?

To keep an eye on whether tasks that you have assigned to other users have been completed, use the Observation function.

To do this, create the filter “Requester equals ME (or your user name)” in the tasks and observe this filter. You will then receive a notification as soon as the status, progress or description is edited or the agent completes the task.

Tip: Create a dashlet for this purpose.

1. Configure filter

2. Activating observations

Notifications as soon as a colleague works on it

Requestor equal "me"

Task

Taking over tasks from a different editor

If tasks need to be taken over by another editor (e.g., in the event of illness, etc.), you can filter for this.

The screenshot shows the ADITO task filter interface. At the top, there are buttons for 'all', 'one', 'Add filter condition', and 'Add group'. Below these, a filter condition is set: 'Status not equal "completed"'. Below this, another filter condition is set: 'Editor equal "Susanne Lustig"'. A dropdown menu is open, showing a list of editors with their initials, first name, last name, and department. The 'me' button is highlighted at the bottom of the dropdown.

	Firstname	Lastname	Department
IJ	Isatou	Jammeh	Service / Office staff
LR	Linda	Reiter	Management
SL	Susanne	Lustig	Distribution / Office staff
MH	Melanie	Hueber	Distribution / Field staff
SN	Sarah	Nagel	Service / Field staff
HO	Herbert	Obermeier	Management
me			

Whether tasks can be accessed by colleagues must be considered on a project-specific basis, as the authorization concepts must be taken into account.
